

Implementation and evaluation of an Ethernet based DAQ for a beam telescope

Current status:

Beam rates and corresponding data rates

Basis

- **Use rates of the usual beam sites**

$$R = B \cdot a \cdot l \cdot e$$

- DESY
- PSI
- MAMI

- **MuPix 10 properties**

- Area: 4 cm²
- Efficiency: 1

- **One to four layers**

Basis

- **Use rates of the usual beam sites**

- DESY
- PSI
- MAMI

$$R = B \cdot a \cdot l \cdot e$$

$$S = 7 + 2 \cdot n$$

$$D_w = \left(R \cdot \frac{1}{n}\right) \cdot S$$

$$D_w = \left(R \cdot \frac{1}{n}\right) \cdot (7 + 2 \cdot n)$$

$$D_b = \left(R \cdot \frac{1}{n}\right) \cdot (7 + 2 \cdot n) \cdot 32$$

- **MuPix 10 features**

- Area: 4 cm²
- Efficiency: 1

- **One to four layers**

- **Different sizes of MuPix packets**
